

Product description

This saves time when installing the protected cable transition with installation housing 25 mm (short version, e. g. model 10312-10/10314-10) in wood structures. It consists of two radius end pieces and 5 stainless steel screws to fasten the installation housing and the plate on the opposite side. When using the 10313 installation set, only a cutout is required, with no finishing work. There is no longer the need to chisel out to fit the installation housing and the square fastening plate.

Note

- For long version: Width 24 mm
