VM Series Specialized Mounting Brackets

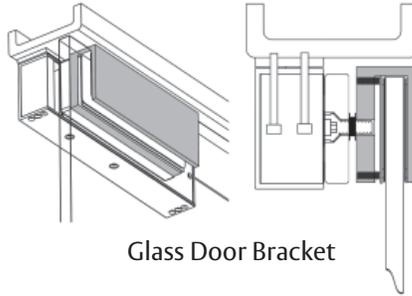

BRACKET

TYPICAL INSTALLATION

APPLICATION

GDB

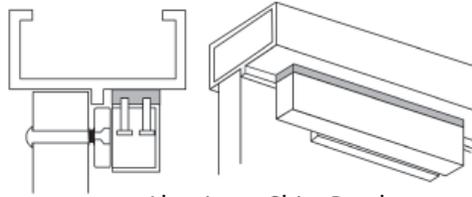

Glass Door Bracket

- GDB - Allows for Maglock installation on solid glass doors
- Armature plate screws into bracket
- Includes rubber gasket and steel

ASB

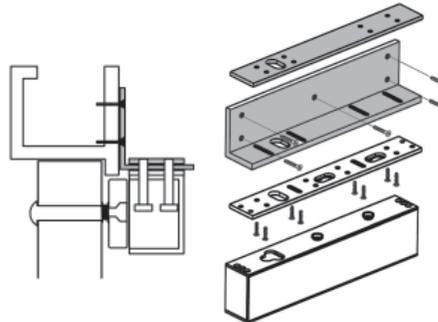

Aluminum Shim Bracket

- Includes rubber gasket and steel tension plate
- VM300 and VM600 versions will allow up to 9/16" thick glass, VM1200 will allow up to 5/8"
- ASB - Used when a blade stop requires the Maglock to be lowered as with most aluminum frame glass doors
- Comes pre-drilled (lock specific) with countersinks for the mounting bolts and wire for VM600 & VM1200

HEB

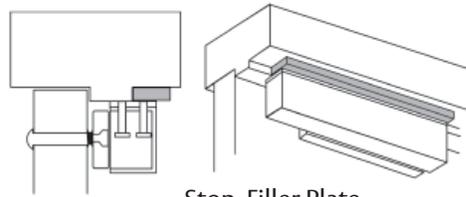

Header Extension Bracket

- HEB - 90 degree angle brackets
- Extends narrow headers to permit proper mounting of VM600 & VM1200 Maglocks
- 2nd standard mounting bracket provided for additional strength

SFP

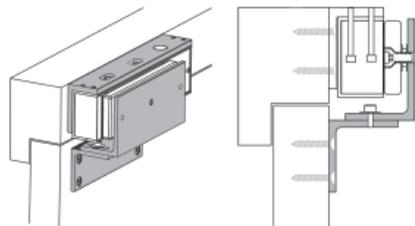

Stop Filler Plate

- SFP - Used to extend the door stop
- Creates a flat mounting surface for the VM600 & VM1200 Maglock
- Available 1/4", 3/8" & 1/2" thickness, specify brushed aluminum or black
- 10.5" long x 1.25" wide

Z Kit

Z Bracket Kit

- Z Kit - Used to mount VM300, VM600 & VM1200 on the secure side of a door that swings into a secured area
- Fully adjustable bracket provides additional lateral movement to address the most challenging doors
- Allows for precision adjustments
